# MASCULINE AND FEMININE ACTIVITY

In Grade 4, students recently engaged in an activity focused on understanding masculine and feminine forms in language. Through this exercise, they explored the differences between masculine and feminine nouns, using examples from everyday life, such as professions, animals, and family roles. The activity was designed to enhance their grasp of gender distinctions in language while promoting respect for both genders. Students participated actively in discussions, demonstrated their understanding through exercises, and shared their findings with the class. This hands-on approach helped deepen their knowledge and encouraged thoughtful reflection on the topic.
